The State of Domestic Violence in Sacramento County

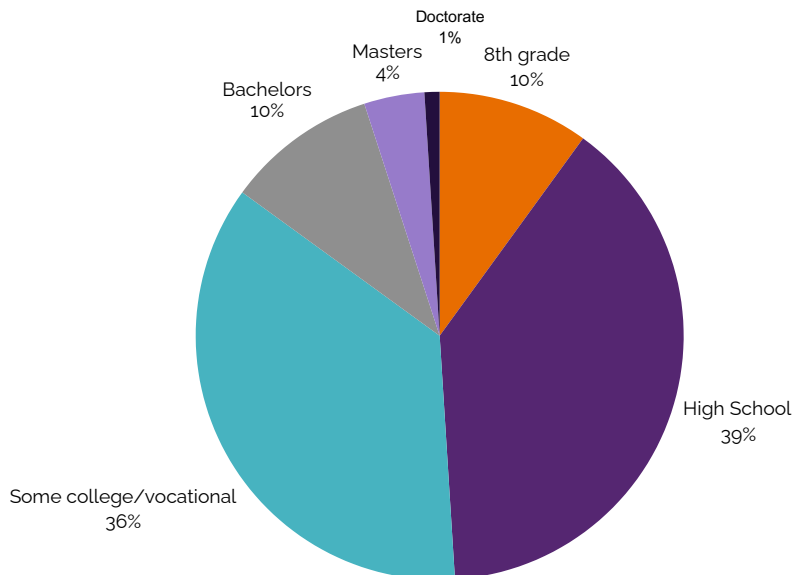

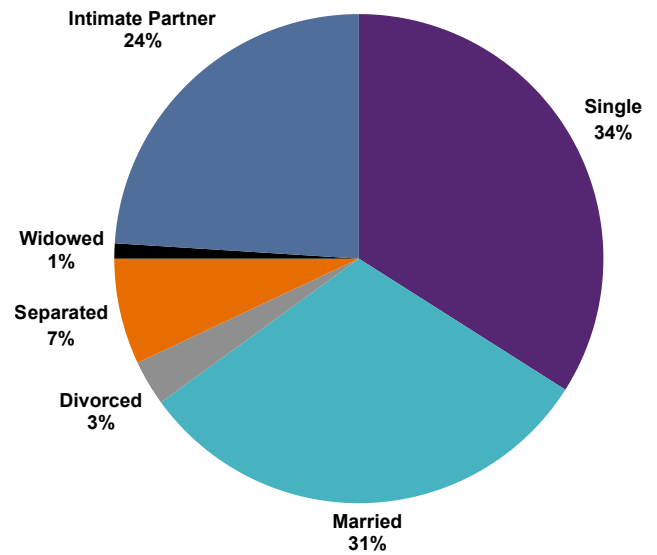

Ages of Survivors

WEAVE primarily served adult survivors between 21 and 50 years (80%). Older adult survivors seeking services continues to increase with survivors between 51 and 60 years representing 10% of survivors served and those over 61 years representing 4%. Children and youth (6%) served through domestic violence programs are primarily children staying with their parent in WEAVE's Safehouse or Transitional Housing programs.

Relationship Status of Survivors

The relationship status of the domestic violence survivors served were very diverse. One-third (34%) identified as single at the time of seeking services, while 31% were married, and 24% were in an intimate relationship with the abuser. Ten percent of those seeking services were separated or divorced and 1% were widowed.

Education Level of Survivors

The education level of survivors varies with 15% of survivors served having obtained a college degree while 36% had some college or vocational experience, 39% had completed high school and 10% did not have a high school diploma or GED.

40% of survivors receiving in person services report living with a disability or access or functional need.

WEAVE provided services in eight languages. WEAVE ensures language access by employing multilingual staff and through interpreter services.
